Hi Rachel
Sorry to bother you again, but do you think that the 2015-1017 phoenix zoo squirrel data might contain this same calculation issue? I cannot tell for sure by examining the values.
Thanks Stuart

Hi Stuart-
I added a column called SCBI diln CF to divide everything by 10. So all hormones on both files are corrected.

Best,
Rachel

Subject: squirrel data results from Janine

Hi Rachel
I just received the results of the remaining male squirrel data and Nikki determined that there was a calculation error—a divide by 10 is required. I took a look at the other data and it appears that the miscalculation is in those data results as well. Do you think that I need to do this calculation with all of the results? I just want to be sure that I am reporting the values correctly.
Thanks Rachel
